

The Apollo is a new distinctive range of LED illuminated Kiosks combining all the versatility to interact with a whole host of information resources through its 17" capacitive touch screen. Add on a vandal resistant IP65 sealed keyboard & tracker ball and you have an Internet access Kiosk that can operate via wireless LAN or static point. If your customer requires a transactional kiosk then the Apollo comes into its own. The modular design allows you to provide customers with complete E-payment revenue solution, incorporating secure collection of note and coin tender, and if required a Chip & Pin reader and receipt printer. If it's queue busting or ticketing solutions you require. Then the Apollo can accommodate a multitude of printer types, including Boca and A4 offering you the ability to provide a full range of unattended booking and check in/out facilities.

Manufactured in the UK to stringent quality control utilising powder coated mild steel, the Apollo is a robust Kiosk fully up to the challenges of today's high-use public environments.

The Kiosks swept profile and LED illumination is a seamless combination of form and function, and ensures the Apollo is aesthetically suited to any contemporary environment.

Benefits:

- Improve Accessibility
- Secure web browsing
- Minimise queue lengths
- Customisable branding options
- Offer out of hour's access to services
- Modernise your operating environment
- Vandal & hacker resistant Internet platform
