

The Bravo, a new range of Kiosks designed with versatility in mind, is now available with a fully integrated A4 Colour Laser Printer. The Bravo will allow customers to interact with a whole host of information resources through its 15", 17" or 19" capacitive touch screen. Add on a vandal resistant IP65 sealed keyboard & tracker ball and include the A4 colour laser printer option and you have a fully self-contained multimedia device capable of printing full colour onto A4 standard paper.

The Bravo Kiosk's versatility also allows it to provide a range of transaction options bringing it into a league of its own. The modular design allows the kiosk to provide customers with complete E-payment revenue solutions, incorporating secure collection of both coin and note tender, Chip & Pin readers and a variety of receipt and ticket printers.

The Magicolor 2550 printer is positioned as one of Konica Minolta's entry-level colour laser printers offering some very nice features. It is capable of printing 20ppm in monochrome and 5ppm in full colour with a native resolution of 600dpi and effective maximum resolution of 2,400dpi through dithering. The printer comes as standard with 128Mb of memory.

**Benefits:**

- Improve Accessibility
- Secure web browsing
- Minimise queue lengths
- Customisable branding options
- Offer out of hour's access to services
- Modernise your operating environment
