

This particularly flexible Kiosk will deliver a full range of Internet services directly to your customers. Whether you want users to surf-the-net freely, or simply have access to a particular website, the Internet Kiosk can be configured to give as much control over user access levels as you need. The unit can also be fitted with a touchscreen and/or stainless steel keyboard and trackerball, both of which are designed to ensure ease of use and enable users to complete a variety of online activities independently.

With a footprint of just 0.25 meters squared this robust unit is ideal in busy situations where floor space is limited. Designed and manufactured in-house from stainless steel, you can be sure that whatever the application, this rugged Kiosk is up to the challenges of a high-use public environment. Dicoll Kiosks are also designed to be wheelchair friendly in keeping with DDA guidelines.

The Internet access kiosk can be customised with a range of peripherals to ensure a best-fit solution for your organisation. Should you require something completely bespoke, Dicoll also offer a full solution design service.

Benefits:

- Secure web browsing
- vandal & hacker resistant Internet platform
- Keyboard & trackerball sealed against liquid spills

Applications:

- e-gov applications
- secure public Internet access

Should you require something completely bespoke, Dicoll also offer a full solution design service.
