

The Dicoll KIT kiosk is designed to be hugely flexible by catering for both LCD interactive solutions and traditional display needs at the same time.

The Dicoll KIT kiosk provides a low cost, functional, multipurpose kiosk, supplied as either a flat pack self build solution or fully delivered and installed. This flexible solution offers a unique way to purchase a low cost floor standing interactive kiosk.

The KIT Kiosk comes with a 19" LCD and integrated Touch Screen PC, an adaptable height-adjustable stand and a combination of shelf and front panel options. The Kiosk is designed to allow the user to easily interchange between a front panel and the versatile shelf arrangement to allow maximum flexibility.

Ideal in situations where floor space is limited the KIT kiosk provides a unique Kiosk solution which can be adapted to suit many different environments and requirements.

Benefits:

- Adaptable kiosk solution
- Low cost
- Quick delivery
- Customisable branding options
- Small footprint
- Interchangeable shelf/literature holder options

Applications:

- Multi-media presentations
- Product/service information
- e-learning
- Exhibitions, Shows, Retail, Corporate and many more

Should you require something completely bespoke, Dicoll also offer a full solution design service.
