

Successful in applications ranging from product demonstration to e-learning, this Kiosk will enable your customers to interact with information resources through touch technology and user-friendly interfaces. Designed for areas where users will be looking for information quickly and easily, this kiosk will give your customers the ability to independently find what they need.

With a footprint of under 0.25 meters squared, this unit is ideal in situations where floor space is limited. Designed and manufactured in-house from stainless steel, you can be confident that whatever the application, this rugged kiosk is up to the challenges of a high-use public environment. Dicoll Kiosks are also designed to be wheelchair friendly in keeping with DDA guidelines.

The Point of Information Kiosk can be customised with a range of peripherals to ensure a best-fit solution for your organisation. Should you require something completely bespoke, Dicoll also offer a full solution design service.
